SUMMARY

Computer Science graduate (B.Tech, 2026) with hands-on experience across the **full software development stack** – frontend, backend, and database design. Currently contributing to a **multi-tenant CRM platform** as part of a development team, with additional project experience spanning REST APIs, authentication systems, and real-time applications. Open to **full-stack** and **backend developer** roles.

EDUCATION

ITM (SLS) Baroda University

Bachelor of Technology in Computer Science (7.00)

Vadodara, Gujarat

2022 – 2026

EXPERIENCE

Genda Phool | *Full Stack Developer Intern*

May 2026 – Present

Project: Sajawat – multi-tenant CRM platform for event management companies

React, Node.js, Fastify, PostgreSQL, Prisma ORM

- Develop and maintain **CRM and business workflow modules** for a multi-tenant SaaS platform, using React, Node.js, Fastify, and PostgreSQL.
- Design **RESTful APIs** and Prisma ORM-based PostgreSQL schemas supporting **role-based access control (RBAC)** across multiple tenant accounts.
- Implement **Google Calendar** and **Google Sheets** integrations using OAuth 2.0, enabling per-user authenticated data sync for meetings, leads, and business records.
- Contribute to **production-grade backend services** and business automation workflows with API-level data validation.
- Led and supervised a full-time intern, managing task allocation, progress tracking, and project execution to ensure on-time delivery.

Protap Club | *Full Stack Developer*

Jan 2026 – May 2026

Project: NFC-enabled Student Attendance System

Node.js, Express.js, MongoDB, JWT

- Architect an **NFC-enabled attendance backend** integrated with the college ERP system, automating daily student attendance tracking.
- Engineer **RESTful APIs** using Node.js and Express.js for secure NFC authentication and real-time data synchronization.
- Design **MongoDB schemas** with indexed query pipelines and Zod validation, reducing query execution time.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, Java, SQL
- **Frameworks & Libraries:** React, Node.js, Express.js, Socket.IO, Tailwind CSS, Tan Stack Query, Zustand
- **Databases & Backend:** MongoDB, PostgreSQL, Prisma ORM, Firebase
- **Tools & Platforms:** Git, GitHub, Postman, Docker, Linux, Nginx, JWT, OAuth 2.0
- **Technologies:** REST APIs, WebSockets, Three.js, GSAP, RBAC, Database Design, System Design Fundamentals
- **AI/LLM:** Claude AI / Claude Code, Prompt Engineering, LLM Integration (Gemini, OpenAI)
- **Relevant Coursework:** Data Structures & Algorithms, OOPS, DBMS, Operating Systems, Computer Networks

PROJECTS

CodeFolio Insights | *React, Node.js, Express, MongoDB, Gemini AI, OAuth 2.0*

[\(Live | Source\)](#)

- Built a full-stack analytics platform aggregating data from **3+ APIs** (GitHub, LeetCode, GeeksforGeeks) to compute weighted employability scores via custom scoring algorithms.
- Integrated **Google Gemini AI** for resume parsing through structured prompt chains, and secured auth using OAuth 2.0 and JWT.
- Reduced redundant API calls by **~60%** using TanStack Query server-state caching, with Zustand for global state management.

VoyageGen | *React, Node.js, Express, MongoDB, Gemini 2.5 Flash, SerpAPI*

[\(Live | Source\)](#)

- Engineered a **5-agent AI pipeline** (Supervisor, Research, Planner, Pricer, Quality) that autonomously generates B2B travel quotations across 15+ configurable parameters.
- Implemented **RBAC** with JWT and bcrypt across 3 user roles securing 10+ rate-limited endpoints, with async polling for real-time agent progress and **automatic error recovery** per stage.

Real-Time Chat Application | *React, Node.js, Express, Socket.IO, MongoDB, JWT*

[\(Live | Source\)](#)

- Built a full-stack messaging app with **bidirectional WebSocket communication** via Socket.IO, supporting instant messaging, typing indicators, and online presence tracking.
- Optimized MongoDB schemas with compound indexes for **sub-100ms** retrieval and secured channels with **JWT handshake authentication** keeping streams user-scoped.

Auto-DevLog (VS Code Extension) | *Node.js, VS Code Extension API, Gemini AI, Markdown*

[\(Source\)](#)

- Built a modular VS Code extension with event-driven file monitoring and a **500ms debounced** capture engine that automatically journals developer activity.
- Engineered a **crash-safe persistence layer** with synchronous JSON backups on every capture, with zero data loss across IDE restarts.
- Integrated **Gemini AI** with low-token-budget truncation and structured prompts to auto-generate Markdown developer logs.

ADDITIONAL INFORMATION

- **Hackathons:** Active participant in hackathons and coding competitions, building functional prototypes under time constraints.
- **Event Management:** Hands-on experience organizing and managing events, coordinating logistics, teams, and timelines end-to-end.
- **Leadership & Business Acumen:** Strong leadership exposure with practical understanding of business logic and operational decision-making.
